
ELECTROROUTE'S BUSINESS TARIFFS

ELECTROROUTE ENERGY TRADING LIMITED

Non-domestic gas tariffs are determined based on multiple factors like your business size and your projected gas consumption. Since they are calculated on a case-by-case basis they are not published on our website.

Each potential new customer seeking to enter a non-domestic gas supply agreement with ElectroRoute will be presented with a tariff carefully established and tailored by our pricing team.

There are certain Pass-Through Costs that will be added to the final price charged, those are approved and published by the CRU on a yearly basis. These are Transmission Tariffs and Distribution Tariffs. These tariffs are calculated as per requirements under the EU network code on harmonised transmission tariff structures for gas. For more information on those, please visit the CRU's website: <https://www.cru.ie/publications/27524/>.

Applicability

This High-Level Statement on Gas Tariffs applies to ElectroRoute's non-domestic gas supply activities.
